SUMMARY

Fresh Electrical Engineering graduate from Institut Teknologi Sepuluh Nopember with knowledge of data analysis, visualization, and reporting using Excel, SQL, Tableau, and Power BI. Developed end-to-end analytics projects involving data cleaning, SQL querying, dashboard development, and business insight generation to support data-driven decision-making.

SKILLS

- SQL (MySQL, SQLite)
- Tableau
- Power BI (Power Query, Visualization, Basic DAX)
- Microsoft Excel (XLOOKUP, Conditional Formatting, Pivot Tables)
- Microsoft PowerPoint
- Languages: Indonesian (Native), English (Bilingual)

PROJECTS

Adidas US Sales Analysis – Personal Project

Tools Used: SQLite, Excel, Tableau

- Analyzed a mock sales dataset (9,653 transactions) using SQLite, incorporating CTEs, subqueries, and CASE expressions to identify trends in profitability, regional performance, sales channels, retailers, and seasonality.
- Identified key business findings and developed actionable recommendations across product profitability, regional performance, sales channels, and seasonal demand patterns to support business decision making.
- Created an interactive Tableau dashboard featuring KPI cards, combination charts, and dynamic filters to communicate findings visually, supported by data cleaning in Excel to ensure dataset accuracy prior to analysis.

HR Analytics Dashboard – Personal Project

Tools Used: SQLite, Excel, Power BI

- Analyzed an HR dataset containing 1,470 employee records to identify factors influencing employee attrition, compensation, and workforce trends using SQL.
- Developed an interactive Power BI dashboard featuring KPI cards, heatmaps, slicers, and custom visualizations for HR reporting.
- Generated actionable HR recommendations by translating analytical findings into executive friendly dashboard visualizations and key findings.

WORK EXPERIENCE

Power System Distribution Planner Intern, PT PLN (Persero)

December 2023 – January 2024

- Created a geodatabase mapping over 10 distribution sites, improving access to asset data by standardizing transformer and cable attributes in QGIS from Excel exports.
- Ensured 100% integration accuracy of new assets by performing on-site surveys at developing residential complexes and reconciling field measurements with system records.
- Streamlined distribution evaluation by categorizing large consumer load datasets in Excel, enabling consistent load assessments for the planning division.

Logistics Staff, EVOLUTION 12

November 2022 – August 2023

Annual national Olympiad, robotics, and band competition for High School students hosted by Electrical Engineering Department of ITS

- Communicated with vendors to determine schedules, technical specifications, and transportation arrangements.
- Created structured evaluation list of vendors based on pricing, delivery times, and performance reviews.

EDUCATION

Institut Teknologi Sepuluh Nopember (ITS) – GPA: 3.26/4.00

August 2021 – August 2025

Bachelor's Degree in Electrical Engineering, specializing in Power System Engineering
