SUMMARY

Fresh Electrical Engineering graduate from Institut Teknologi Sepuluh Nopember with knowledge of data analysis, visualization, and reporting using Excel, SQL, and Tableau. Experienced in organizing and analyzing data through personal projects and organizational experiences, with the ability to present clear insights to support problem solving and decision-making.

SKILLS

- SQL (MySQL)
- Tableau
- Microsoft Excel (XLOOKUP, Conditional Formatting, Pivot Tables)
- Microsoft PowerPoint
- Languages: Indonesian (Native), English (Bilingual)

PROJECTS

Adidas US Sales Analysis Dashboard – Personal Project

Tools Used: MySQL, Excel

- Analyzed transactional sales dataset (9653 transactions) using pivot tables to group and summarize data across product, time, and category variables, identifying business insights such as sales trends over time, per region, and retailer revenue performance.
- Created a dashboard using pivot tables and slicers in Excel to help users compare performance across different products, regions, and time frames.
- Performed data cleaning by erasing duplicate entries and correcting inaccurate data formulas to ensure accurate representation of sales dataset.

Airbnb Seattle 2025 Data Analysis Dashboard – Personal Project

Tools Used: Excel, Tableau

- Performed basic data preparation of dataset (6900 listings, and 1,080,000 bookings) in Excel by converting data types, organizing fields, and standardizing formatting prior to visualization in Tableau.
- Created an interactive dashboard in Tableau using charts and filters to allow users to compare price and revenue listing metrics across neighborhood groups and room types.

WORKING EXPERIENCE

Power System Distribution Planner Intern, PT PLN (Persero)

December 2023 – January 2024

- Created a geodatabase mapping over 10 distribution sites, improving access to asset data by standardizing transformer and cable attributes in QGIS from Excel exports.
- Ensured 100% integration accuracy of new assets by performing on-site surveys at developing residential complexes and reconciling field measurements with system records.
- Streamlined distribution evaluation by categorizing large consumer load datasets in Excel, enabling consistent load assessments for the planning division.

Logistics Staff, EVOLUTION 12

November 2022 – August 2023

Annual national Olympiad, robotics, and band competition for High School students hosted by Electrical Engineering Department of ITS

- Communicated with vendors to determine schedules, technical specifications, and transportation arrangements.
- Created structured evaluation list of vendors based on pricing, delivery times, and performance reviews.
- Kept 100% operational uptime during live events by implementing contingency plans, and addressing participant's needs in under 5 minutes through on-site rapid response procedures.

EDUCATION

Institut Teknologi Sepuluh Nopember (ITS) – GPA: 3.26/4.00

August 2021 – August 2025

Bachelor's Degree in Electrical Engineering, specializing in Power System Engineering
